## Project Spotlight

### Beale Street Entertainment District

Beale Street Entertainment District, the Home of the Blues in downtown Memphis, wanted to secure this downtown pedestrian area from vehicular traffic. They partnered with Concentric Security, LLC to develop a vehicle mitigation solution to meet their security needs and preserve the district's atmosphere for their guests.

#### Challenges:

The existing underground utilities were close to the surface, preventing the use of a traditional deep mount bollards. In addition, Beale Street Entertainment district wanted a solution that blended in with the aesthetics and atmosphere of the area.

#### Solution:

With underground utilities providing a challenge, the Matador 6 bollard arrays were the ideal solution to securing this popular tourist destination with the crash rated shallow mount foundation. Preserving the surrounding look and feel of this popular tourist destination was also important. The Matadors are customizable and were given bollard covers to blend in with the look of the streetlights.

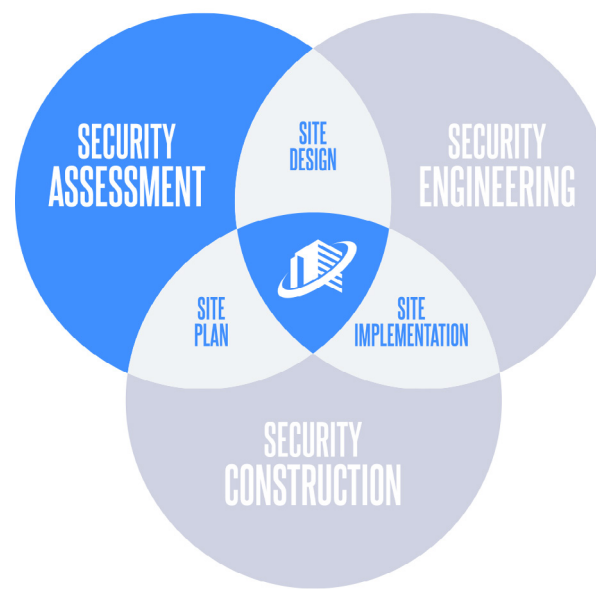

## Concentric Security Solutions Spotlight

Every facility is unique, with different security needs, challenges, stakeholders, and technology requirements. Helping facilities find the right Perimeter Security Solution takes a proven process of Assessment, Engineering and Construction.

Starting with [Security Assessments](#), a detailed analysis of the site is needed to develop a practical, integrated plan. The analysis includes:

- Vulnerability Assessment
  - Gathering Places
  - Pedestrian Flow
  - Determine Threat Scenarios (DBT)
- Site Characteristics
  - Property Layout/Boundaries
  - Traffic Flow/Types
  - Available Standoff Distances
  - Facility Usage
  - Stakeholder Constraints
- Threat Verification
- Stakeholder Input
- Vector Analysis
  - Review Possible Vectors
  - Analyze Avenues of Approach
  - Assess Roadway Geometry
- Blast Analysis
  - Blast Hazard Mitigation Review
  - Standoff Distance Review

Concentric Security will work with you to develop the options and formulate a plan with your customer in mind.
